

Hello, I'm Josh Chernoff

Phone: (971) 570-9721
Email: jchernoff@morphic.pro
Location: Portland, OR

I've been working in this industry since Flash was still owned by Macromedia. Most of that work was Post-Production Animations and App development which was focused in the Marketing sector. During that time I've worked with brands such as Macy's, The Food Network, Mattel, and Hallmark. Towards the end of Flash, I moved over to PHP and focused on building custom CMSs for clients using Wordpress, Drupal, and Magento. Around 2012, I was introduced to Ruby on Rails and was hired for an in house position at a small agency where I crafted my ruby skill set.

Around 2014 I worked for a mobile app company named CVent where I worked for a number of years as a Server-Side Ruby developer. Later I worked for a local nonprofit using Elixir with Phoenix. In the last 3 years, I've mainly focused on Elixir with JS and React and with some Ruby here and there. In addition to my focus as a developer, I also find time to do photography.

- Josh Chernoff

Focus and Skills.

Most recently I've found new interests in Javascript (via ES6) and Elixir as I feel these two program languages are rapidly evolving and are currently shaping the web as we know it today.

Below is a table of my past and current areas of focus and tools I've used.

Focus	Framework / App	Time	Notes
Ruby	Rails, Sinatra	6+ years	Primarily background
Elixir	Phoenix	2 years	Currently Most interested in
Java Script	React, Redux, ES6, Babel	6+ year	
DevOps	Docker / CI / CD / HTTP, Database / AWS	3 years	Not something I do every day But I can when I need to
ActionScript 3	Flash, Flex, Flash media server	5 years	Primary focus till 2010
Python	Django / Blender 3D	limited	Academics before 2010
Design	Adobe Photoshop / Illustrator	3 years	Mostly ad sector work
Motion Graphics	Adobe After Effects	1 year	Mostly ad sector work
PHP	Wordpress, Drupal, Magento	3 years	Mostly ad sector work
Project tracking	Jira, Basecamp, Rollbar	4 years	
Photography	Sony A7iii / Canon T7i	1 year	Freelance

Work History

Focus Vision

From: 02/2019

To: 03/2020

Position:

Full Stack Developer. / Elixir Dev

I did a little of everything while working for Focus Vision from Elixir and Phoenix to JS and React to Python and AWS to Ruby and Rails. Focus Vision gave me an opportunity to work on a Machine Learning pipeline that would ingest videos and through multiple services and processes would deconstruct the video down into transcriptions, sentiments and other analytical data points.

Professional Reference:

Kyle Scherling kscherling@focusvision.com | Direct Manager

Jake Kaad jkaad@focusvision.com | Coworker

Self Employed / Freelancer

From: 05/2018

To: 02/2019

Position:

Full Stack Developer.

Elixir, Phoenix

Ruby, Rails

JS, React

Postgres

Dev Ops

I upheld a few small contracts with a variety of companies as a Ruby developer.

Most of the time I was working to support legacy systems, upgrade libraries and refactor code where I could.

I also at this time picked up learning React and Redux.

Work History

Impact NW

From: 02/2017
To: 04/2018

Position:
Full Stack Developer.

Elixir, Phoenix
Ruby, Rails
JS, React
Postgres
Dev Ops

I initially began as a Ruby Developer and built an application using rails to allow help desks to intake data at hospitals. After the successful completion of that project I was later commissioned to revitalize a prior failed attempt at an app that would be used to intake all of Impact NW's data.
I was allowed to rebuild this app using Elixir and Phoenix.
I also learned a great deal about 508 and HIPAA compliance.

Crowd Compass

From: 04/2014
To: 03/2017

Position:
Full Stack Developer.

Ruby, Rails
JS, Ember
Postgres
Dev Ops

For 3 years I worked on the API and Admin Platform that was 3 monolithic rails apps.
The front end Ember app and the mobile apps depended on these APIs which were managed by other teams. I learned a bit about different workflows and team structures as we tried everything from cross functional to siloed teams to kanban to agile and waterfall workflows.

Work History

The Able Few

From: 09/2012
To: 10/2013

Position:
Full Stack Developer.

Ruby, Rails
JS
Postgres
Dev Ops

Just breaking my teeth into ruby, I started with this small agency doing gig work for a variety of clients.
Looking to return

GFX Complex

From: 04/2007
To: 04/2012

Position:
Freelance Web Developer.
Subcontractor for Flash / Actionscript 3 development and WordPress development and design

Notable Past Projects:

- **Spry Digital** What A Ya Nuts - 04/2012
- **Osborn & Barr** Soy New Uses - 10/2011
- **Phoogoo** Portland Candles - 03/2011
- **Clear Media** Style Rx - 10/10
- **Matchbox Design Group** Swiss Miss Teas - 06/10
- **Matchbox Design Group** Energizer Facebook App - 03/10
- **Clear Media** Macy's & Clinton Kelly Make Over America - 01/10
- **Decision Counsel** Shop Mattel - 11/09
- **Decision Counsel** Cook or Be Cooked - 11/09

“Josh is a dedicated and diligent worker. The perfect balance of integrity, pragmatism, and idealism.” - Mike Bishop

(314) - 537 - 6723 - michael.bishop@mediprocity.com

“Josh has a lot of drive. He is always asking questions and wanting to dig to the root of why. He will take direction on how to do something and do it when he needs too, but would rather understand the reasons behind why he should do it that way. Josh always has a smile and cares deeply about his fellow man.” - Amos King

Ruby / Elixir Developer (573) - 263 - 2278 - amos.l.king@gmail.com -
